This week, though, federal agents in Arizona arrested a retired sheriff's deputy from a small town about 80 miles south of Phoenix named Patrick "Hunter" McVay. The federal government suspects that McVay may be a terrorist, and that he may be collaborating with others to plot a mass shooting. But first, he had to be caught. We don't yet know the exact circumstances of McVay's arrest. He was arrested at his home, and the agents found guns, "an alarming number" of high-caliber rifles, a small arsenal of ammunition, and explosive devices that he apparently had been building. And we don't know how he was caught, either. Local news reports suggest that he's been in the throes of a mental breakdown, but so far there's no evidence to suggest that he's mentally ill. He told investigators that he was a former Marine and that he "wanted to have a network of people that were all ready for what is coming." Some evidence suggests that McVay was indeed planning a terrorist attack. "Investigators say McVay was using a laptop that was stolen in an Oct. 18 burglary at a home about four miles from his home," according to the Phoenix New Times. He wrote about having weapons training and being a former Marine. He purchased ballistic vests and tried to get a security job. But we also don't know whether McVay had ties to the Islamic State or to any other group or whether he was actually a terrorist. The only thing we do know

Why not tell a true story, like the one in the legends of King Arthur? Yes, I agree, the legends of King Arthur are far more interesting than what happens on a random quest you initiate on your own! In retrospect, the main problem is the fact that all of the NPCs in the legends of King Arthur are already dead. There are still NPCs in The Legend of King Arthur
